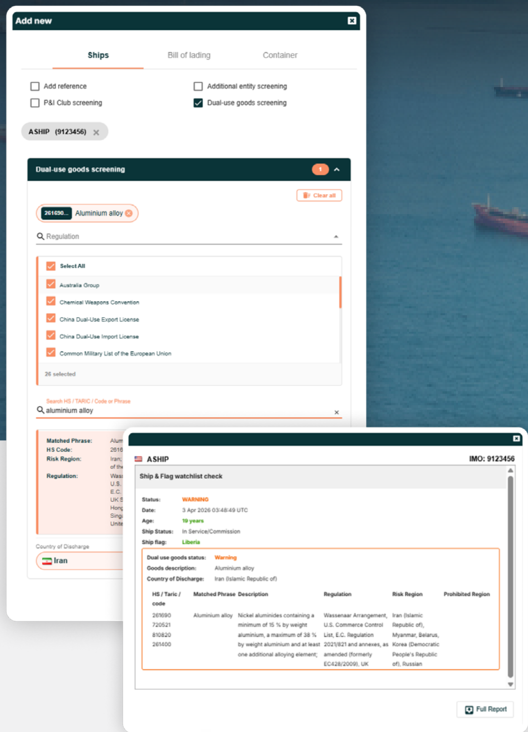
PURPLETRAC

DUAL-USE GOODS (DUG) SCREENING

Verify your Bill of Lading, dual-use goods risk, and vessel sanctions. All in one simple automated check. Instantly.



Dual-use goods (materials, components, and technologies with both civilian and military applications) require specific export licences when shipped to restricted or sanctioned regions. For trade financiers, assessing this risk has always meant leaving your workflow to cross-reference external databases and check jurisdictions manually.

PurpleTRAC changes this entirely. Enter a Bill of Lading number and a description of goods. Instantly screen against 25+ international regulation lists, cross-reference the discharge jurisdiction, and get a clear risk status. All inside your sanctions screening environment.

WHO BENEFITS?

Trade Finance Banks: Assess dual-use goods risk on financed shipments before before funds are committed. No need to leave PurpleTRAC.

Compliance & Legal Teams: Maintain a documented, audit-ready due diligence trail for every Bill of Lading screened, ready for regulators and insurers.

Transaction Monitoring Teams: Surface dual-use goods risk signals earlier in the transaction lifecycle, reducing retrospective exposure.

INSTANT ANSWERS

BOL number and goods type is all you need. Get a clear risk status in seconds, not hours.

ONE ENVIRONMENT

DUG screening runs alongside your Bill of Lading, container, and vessel checks. No tool-switching required.

25+ REGULATION LISTS COVERED

Wassenaar Arrangement, US Commerce Control List, EU 2021/821, MTCR, Chemical Weapons Convention, and 20+ more.

JURISDICTION-AWARE RISK SCORING

Automatically flags if the discharge country is a Risk Region or a Prohibited (sanctioned) Region.

AUDIT-READY BY DEFAULT

Every search is documented including unmatched goods. Your due diligence is always on record.

CONFIGURABLE PER ACCOUNT

Admins set default severity levels for Risk and Prohibited Regions to match your compliance policy.

Discover how DUG Screening on PurpleTRAC can protect your trade finance operations from dual-use goods exposure.
